NGIOKA CENTRE PLANT ORDER FORM

Note:
Please be advised that when preparing your native plant list, park committees should consider planting requirements in advance as much as possible. Once plant orders are approved by the Parks Team, Council will require 6 to 12 months' notice for orders to be ready based on the type of plant, growth rate, season and seed availability. As per Council's recommendation, and based on past history, Council will be able to supply 2,000 to 3,000 plants in total to be shared amongst park committees. All plants supplied this way will be free of charge. Environmental Services will continue to source endemic local seed. If native cuttings are required to be propagated for local projects, committees can take their cuttings to Ngioka Centre for propagation by Ngioka Volunteers and/or committee members.

Committee name: ……

Committee contact: ……

Area to be planted: ……

Time of planting: ……

Comments: ……

……

Has this plant requirement been discussed with your Parks Supervisor? ……..

Please return this form to the Parks Supervisor for your committee/group.
