Overview

This code aligns with the Information and Direction Signs in Road Reserves Policy. This code addresses the issue of signposting within the road reserve, Council owned property and private property. Its purpose is to assist in assessments regarding signage, but is not to be used exclusively.

This code acknowledges that other forms of legislation and instruments such as SEPP Infrastructure and SEPP64 may take precedence over this policy. This code provides a level of detail that is not covered in these SEPPS.

Purpose

To provide a safe, effective and efficient network of signs to guide motorists to Tourist Services, Community Facilities and natural features within Port Stephens. Motorists should be guided to the **Suburb**, then the **Street** and finally the **Facility**.

It is the intention of this code to cover roads and reserves under Council's care and control, it does not include state roads. Signs on state roads will be determined by Transport for New South Wales (TfNSW).

General Principles

The following general principles need to be observed in the implementation of this Code:

- (a) Tourist and Services signing is primarily about traffic management through the efficient and safe direction of traffic to facilities. Except for gateway signage, signs are not to be used for advertising or promotion.
- (b) Sign of facilities is only one part of an effective visitor or traveller information system. The signposting system is supplementary to maps, other printed material and advice through various other media.
- (c) Signs need to be user friendly and meaningful to the traveller. Consistent application amongst road authorities of the sign design and content requirements of this code is essential to ensure that signs are recognised as authoritative providers of information. This code does not therefore generally permit design variations.
- (d) Use of fewer signs and more attention to their placement will result in less visual clutter and a more favorable travelling environment.
- (e) This code should be read in conjunction with other Port Stephen Council documents, not limited to Council's Technical Specification series that may define, for example, sign type details that are different than those contained within this code. Wherever inconsistencies are discovered between Council published documents and this code, clarity should be sought directly from Council in writing.

Method – Hierarchy of signs

Gateway, Locality, Suburb, Street then Facility

- Establish road network hierarchy to determine signposting locations

The following roads are classified as major roads in their localities:

Adelaide Street	Irrawang Street	Port Stephens Street
Bagnall Beach Road	Italia Road	Raymond Terrace Road (state road)
Benjamin Lee Drive	Lemon Tree Passage Road	Richardson Road (state road)
Blanch Street	Lisadell Road	Salamander Way
Brandy Hill Drive	Marine Drive	Sandy Point Road
Bucketts Way	Masonite Road	Seaham Road (state road)
Butterwick Road	Medowie Road	Shoal Bay Road
Cabbage Tree Road (state road)	Mount Hall Road	Soldiers Point Road
Church Street	Nelson Bay Road (state road)	Stockton Street
Clarence Town Road	Nelsons Plains Road	Swan Bay Road
East Seaham Road	Newline Road	Tomago Road (state road)
Ferodale Road	Old Punt Road	Victoria Parade
Gan Gan Road	Oyster Cove Road	Warren Street
Government Road	Pacific Highway (state road)	William Street
Grahamstown Road	Paterson Road	William Bailey Street
High Street	Paterson Street	Woodville Road
Hinton Road	Port Stephens Drive	

Signs on roads listed above will be assessed by Port Stephens Council with the exception of those marked 'state roads', these need the approval of TfNSW.

Signs off 'state roads'

All facilities located off a 'state road' will not be dealt with under the guidelines of this code but will be subject to an application and approval from TfNSW.

Signs on local roads off 'state roads'

Facilities that are located off the local road that joins the 'state road', shall be included on a reassurance sign located near the junction of the 'state road'. These facilities must conform to the Approval Criteria of this code for that facility and be signposted on the local road that joins the 'state road'. A maximum of eight (8) facilities will be signposted on the reassurance sign.

Signs on major roads through Suburbs

These facilities must conform to the Approval Criteria of this code for that facility. A maximum of three (3) facilities will be signposted at an intersection. All other roads within Port Stephens Council will be considered as minor roads and be assessed by Council. Facilities located on the listed major roads will not be signposted from that road unless otherwise specified in the relevant sections. Signs should guide motorists to the *Suburb*, then the *Street* and finally the *Facility*.

Cost

Regardless of the nature of a signage application (for example if it is to be installed as part of development, benefits a private entity or otherwise), costs will be met by the applicant or benefitting party for all aspects of the sign's lifecycle including but not limited to its design, purchase, installation, maintenance and replacement. Signs should be designed to meet a minimum service life of ten (10) years. Where a sign has been in place for longer than 10 years and/or where it has deteriorated to a level unacceptable to Council, whether naturally or otherwise, the sign must be replaced at the benefitting party cost.

Where the sign relates to a facility, until such time that the facility exists and/or the facility ceases operations, the signage shall be managed under the above arrangement. On termination of a facility's operations all signage relating to the facility shall be removed at the facility managers cost.

Where no direct benefitting party is identifiable or where the assessing officer makes a determination that costs will be met by Council, Council may met the lifecycle costs of the sign in full or partially with the remainder to be meet by the applicant as determined by the assessing officer.

They are designed to be read from a vehicle moving at the prevailing traffic speed.

Approval Criteria

Consultation on the site, sign legend and content is a matter for Council, the relevant regional tourism organisation, TfNSW and Tourism New South Wales. The Tourist Attraction Signposting Assessment Committee (TASAC) is the appropriate forum for these detailed considerations.

Sign Type

The sign shall be a sign as approved by the relevant body such as Council or TASAC.

Location for sign
