

Roundabout beautification project

We have allocated \$20,000 to beautify the roundabout at the intersection of Avenue of the Allies and Lemon Tree Passage.

And have developed the following three concepts.

The scope and scale of any works and/or installation is subject to budgets and costings. The purpose of these ideas is to gauge your response to the themes and ideas for the roundabout beautification project.

These works are expected to begin in 2021.

Option 2 - Planting and an iconic sculpture

Ground level planting with drought tolerant vegetation. Substantial iconic sculpture by a local artists and fabricator (possibly of Flannel Flower (shown) dependant on fundraising.

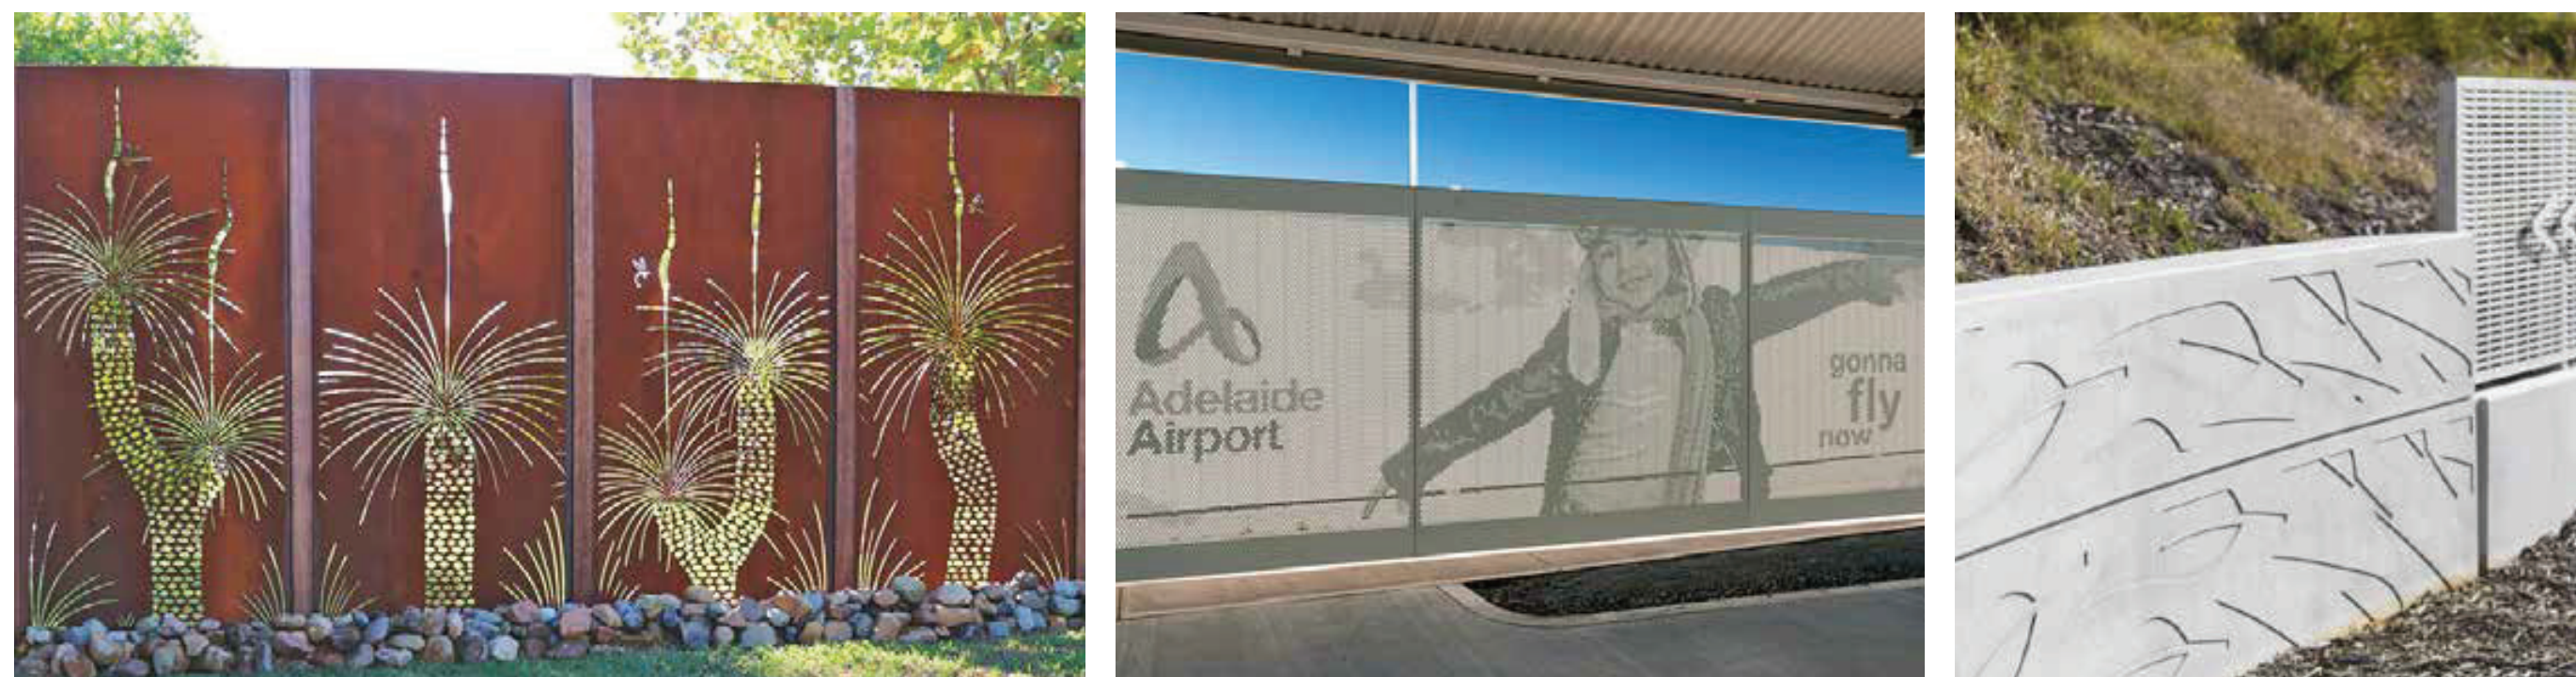

Precedent images showing public sculpture ideas and possible materials and themes.

Option 1 - Walls with integrated artwork and lettering

Curved walls with integrated artwork. Corten steel, stainless steel and/or concrete. Curtilage heavily planted with locally indigenous vegetation

Precedent images show possible themes for art work which may include local flora, local fauna, local Worimi stories (by a Worimi artist). Laser cut panels, perforated steel or cast concrete

Option 3 - Timber walls and planting

Ground level planting with drought tolerant vegetation and a low-key timber wall. Possible to include lettering on timberwork for a 'welcome' message.

Timber upright posts to provide a permeable visual screen and allow for the mounting of lettering.
