

William Street update

Raymond Terrace, July 2023

We've mentioned the commencement of the Stage 2 works for William Street previously in our March 2023 update and we're happy to advise that works are commencing for the shade shelters early next week.

On **Monday 31 July**, you'll see site fencing start to be installed to allow our contractors to start work.

What's included in these works?

The upcoming William Street Stage 2 project will include a number of deliverables to enhance the area, including:

- removal and replacement of existing landscaping including hedging
- landscaping around existing street trees
- cleaning and replacement of damaged pavers
- new entry signage

The removal of hedging plants along William Street will help improve visibility for pedestrians and drivers, while the existing street trees will be retained and evaluated by an arborist.

As part of these works, there'll be 5 canopy seating structures, featuring laser cut elements. These will be installed along the southern side of William Street (the opposite side to Marketplace entrance). We'll also be installing an entry feature at the roundabout approaching William Street from the east. Some street furniture will also be relocated to make the street more accessible.

Artists impression: New canopy seating structures for William Street stage 2 works

Works are scheduled to start on Monday 31 July, taking around 4 weeks to complete.

Nick Montague, Program Manager Community Infrastructure, on 02 4988 0195 or 0407 594 345.

What work is starting next week?

The installation of the 5 canopy seating structures, featuring laser cut elements. These will be installed along the southern side of William Street (opposite side to Marketplace entrance).

Will there be any impact to parking on that side of William Street e.g. loss of parking spaces?

Yes – it is likely that some parking spaces where works are occurring will be temporarily unavailable during the works. The contractor will work to minimise the impact as much as possible.

Will there be any impact on the pedestrian walkway between shops and the road?

Yes – the walkway will be narrowed during the works however it'll remain open for pedestrians.

How long will the site be established?

The project is scheduled for 4 weeks (weather permitting) and should be completed by late August 2023.

What are the start and finish times?

The contractor work window is 7am to 4pm Monday to Friday. Any works outside this window required pre-approval from Council.

Will all 5 shade structures be installed at the same time?

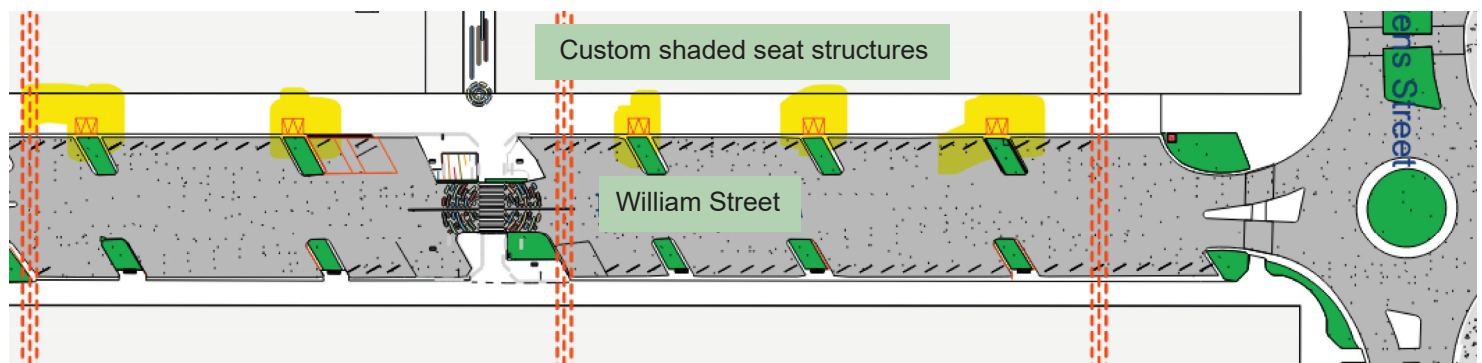

We're working with the contractor to do staged works meaning not all locations will be worked on simultaneously. However, all 5 locations will be fenced from next week.

Will there be much noise throughout the project?

Yes – there may be some typical construction noise generated by the works (power tools, vehicles for deliveries etc).

Will there be any impacts on traffic flow?

No – we don't expect any major impact to vehicular traffic flow along William St other than for material deliveries, and other truck movements to/from site.

Keep up-to-date with this project
